# Portuguese Companies Doing Business in the World

## Portugal has been for centuries a country open to the world

**This attitude gives  
us a great  
motivation and  
openness for  
dealing with all  
nations and  
continents,  
regardless of their  
cultures and beliefs**

This is *what* is needed nowadays when addressing water issues:

A clear understanding that we face basically the same problems  
with approaches differently shaped throughout history

**... but those different approaches aim at the same result:**

**sustainable provision of  
water for all uses,  
at an affordable price,  
managed by a fair system  
of governance !**
