■ The Europe 2020 Flagship Initiative for an Innovation Union proposed the concept of European Innovation Partnerships (EIPs). The EIPs aim to speed up innovation that contribute to solving societal challenges, enhance Europe's competitiveness and contribute to job creation and economic growth.

□ In the first quarter of 2016, the **EIP on Water** launched a bidding process for a host city for its **4**th **EIP on Water Conference**, an event that usually gathers the most important players in the water sector and innovation.

□ In May 2016, a consortium led by the Municipality of Porto presented a bid for hosting the aforementioned conference in the City of Porto.

24 - 30SEP'17

LABORATÓRIO NACIONAL DE ENGENHARIA CIVIL

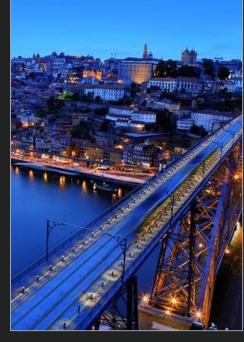

Porto.

- Second-largest city in Portugal
- One of the oldest cities in **Europe**
- The historic Centre is a **UNESCO** World Heritage Site

□ To further enhance their application, the Consortium proposed to organise additional events around the same time as the EIP Water Conference, namely the Mayors & Water Conference and the Water Innovation Lab programme.

Additionally, Porto Consortium also proposed to include an ample Exhibition area available during the events, and a competition for water-related Startups called Splash Innovation Stage.

Porto was eventually selected and announced as host in August 2016.
