PARCERIA PORTUGUESE
PORTUGUESA WATER
PARA A ÁGUA PARTNERSHIP

AS CAPACIDADES DO SECTOR THE CAPABILITIES OF THE SECTOR
AO SERVIÇO DOS DESAFIOS MUNDIAIS AT THE SERVICE OF GLOBAL CHALLENGES

Mission:

The Portuguese Water Partnership's mission is to promote an effective link between professionals, institutions and companies in order to project the knowledge and skills of the Portuguese water sector in the world, and to catalyse opportunities in international markets and in the area of cooperation within the framework of the development of sustainable projects in line with the Sustainable Development Goals.

Main objectives:

- Promote the sharing of knowledge and experience among Portuguese companies interested in internationalization
- Identify and support new opportunities for the development of projects and initiatives in global markets
- Promote dialogue between partners and international institutions and establish multipurpose partnerships
- Promote innovation in the water sector, facilitating cooperation between companies and research centres
- Advance the establishment of a forum for reflection on future challenges

The Partners:

<i>Public and private companies</i>	Design and consultancy companies, construction contractors, equipment suppliers, management and operation companies
<i>Universities and R&D centres</i>	Universities, research centres, state laboratories
<i>Professional associations and civil society</i>	Professional, technical and business associations, specialized media, non-governmental development associations, water user associations
<i>Portuguese Public administration</i>	Environment Protection Agency, River Basin Administrations, Water Services Regulator, General Directorate for Agriculture and Rural Development, Institute for Cooperation, Investment & Trade Agency

Partner data:

@ - Website A - Areas of intervention C - Summary description of core competencies in the "water cluster"

Areas of Partner intervention:

Planning and management of water resources: regulation of the environment and of services

Water services: quality services at socially acceptable prices

Hydraulic developments: robust systems serving multiple goals

Coastal management: matching economic development with environmental protection

Governance: institutions for good water management

Areas of Partner competitive advantage in "water cluster" products and services:

<i>Strategic studies and consulting</i>	Forecasting systems and computational modelling; geographic information systems; strategic planning; public participation; integration of economic, environmental and social components; master plans (water resources, hydropower, water and sanitation)
<i>Engineering projects</i>	Structural design of systems; selection of new technologies; terms of reference and technical specifications; 3D simulation of the planned works; environmental compliance
<i>Construction</i>	Project management; risk management; surveillance; civil construction
<i>System installation and equipment</i>	Manufacture, supply and installation of equipment; electrical installations; components and chemicals
<i>Operation and maintenance services</i>	Remote management and automation; decision support systems; integral management of the services; automatic operating systems; asset management; monitoring and laboratory tests
<i>Technical assistance</i>	Training in specific areas; regulations and technical standards; system performance assessment; advising on the implementation of projects; supervision and monitoring of contracts; preparation and management of financial processes
